## **DETAILED ACTION**

### ***Election/Restrictions***

Applicant's election of Group I in the reply filed on 7/23/2009 is acknowledged. Because applicant did not distinctly and specifically point out the supposed errors in the restriction requirement, the election has been treated as an election without traverse (MPEP § 818.03(a)).

Claims 1, 3, and 8 are being examined herein.

Claims 2, 4-7, 9, and 11 have been canceled.

Claims 10 and 12-15 stand as being withdrawn.

### ***Claim Objections***

Claims 1, 3 and 8 are objected to because of the following informalities: the claims are drawn to "steroidal saponins" compound and would be more favorably written as being drawn to "steroidal saponin" compound. Appropriate correction is required.

Claim 3 is objected to for failing to end in a period. Appropriate correction is required.

Claim 8 is objected to for the term "physicochemical", as it is believed this is meant to be "physicochemical". Appropriate correction is required.

### ***Claim Rejections - 35 USC § 101***

35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

Claims 1, 3, and 8 are rejected under 35 U.S.C. 101 because the claimed invention is directed to non-statutory subject matter.

Claims 1, 3, and 8, as written, do not sufficiently distinguish over the steroidal saponins as they exist naturally because the claims do not particularly point out any non-naturally occurring differences between the claimed products and the naturally occurring products. In the absence of the hand of man, the naturally occurring products are considered non-statutory subject matter. The claims should be amended to indicate the hand of the inventor, e.g., by insertion of "Isolated" as taught by the examples of the specification.

#### ***Claim Rejections - 35 USC § 112***

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1, 3, and 8 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Regarding claim 1, the phrase "including" renders the claim indefinite because it is unclear whether the limitation(s) following the phrase are part of the claimed invention.

#### ***Claim Rejections - 35 USC § 102***

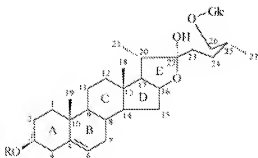

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1, 3, and 8 are rejected under 35 U.S.C. 102(b) as being anticipated by Hu et al., *Planta Medica*, 2002; 68: 297-301.

Hu discloses a compound which was purified from the rhizome of *D. collettii* set forth by the following structure:

This is seen to be the same compound as that as defined by the species of claim 3 of the instant application. Likewise, since claim 8 is seen to provide the physicochemical parameters of the compound of claim 3, and this species is recognized as being known in the art, the properties associated therewith would also be expected to be the same and thus do not render patentable the claim. Since the Office does not have the facilities for preparing the claimed materials and comparing them with prior art inventions, the burden is on Applicant to show a novel or unobvious difference between the claimed product and the product of the prior art. See *In re Best*, 562 F.2d 1252, 195 USPQ 430 (CCPA 1977) and *In re Fitzgerald et al.*, 619 F.2d 67, 205 USPQ 594 (CCPA 1980).
